JAYLORD VHAN FABOR

SOFTWARE ENGINEER | BACKEND DEVELOPMENT & AUTOMATION

Iloilo City, Philippines | +63 919 848 4665 | faborjaylordvhan@gmail.com
Portfolio: jjayfabor.com | GitHub: github.com/jjayfabor | Open to remote roles; willing to relocate

PROFESSIONAL SUMMARY

Software Engineer focused on backend development, API integrations and business automation. Hands-on experience with Laravel, Python, JavaScript/TypeScript, PostgreSQL and Docker. Builds booking and payment workflows, CRM integrations and AI-enabled applications, with experience deploying services on Google Cloud Run.

TECHNICAL SKILLS

Languages: Python, PHP, JavaScript, TypeScript, Dart
Backend & APIs: Laravel, Livewire, REST APIs, webhooks
Frontend & Mobile: React, Flutter, Vite, Tailwind CSS, Bootstrap
Databases: PostgreSQL, MySQL, SQLite, Supabase
AI & Automation: Vertex AI, RAG, LLM integrations, n8n, VAPI AI voice agents, ElevenLabs
Cloud & Tools: Google Cloud Run, Docker, Render, Vercel, Linux, Git, cPanel, Postman
Integrations: HubSpot CRM, Twilio, Stripe, Google Drive, SFTP

PROFESSIONAL EXPERIENCE

Freelance Software Developer — Jun 2025 - Present

Philippines

- Designed API architecture and relational data models for users, providers, availability and bookings.
- Develop a REST API used by an ElevenLabs AI voice agent via Twilio for authentication, OTP verification and appointment booking during live calls.
- Integrated Stripe payments and wallet functionality into the application.
- Build a cross-platform Flutter application for booking and AI-assisted scheduling.
- Improved frontend usability and optimized database queries in preparation for production launch.

Junior Software Developer — Oct 2025 - Jul 2026

Callbox Inc. | Iloilo City, Philippines

- Developed HubSpot CRM workflows and JavaScript/Python custom-coded actions, integrating the CRM with the company's pipeline database through APIs.
- Built and deployed an AI-powered Google Chat bot on Google Cloud Run using Vertex AI and retrieval-augmented generation (RAG) over historical conversations.
- Built n8n workflows for role-based document provisioning across employee lifecycle events, integrating Google Drive, SFTP and email.
- Implemented VAPI AI voice agents for webinar invitations and reminders, supporting 300+ outbound calls per campaign.
- Supported controlled feature rollouts, debugging and issue resolution to improve platform reliability.

Software Development Intern — Feb 2025 - May 2025

Callbox Inc. | Iloilo City, Philippines

- Supported development and implementation of Laravel-based applications using MySQL.
- Assisted with application performance optimization, debugging and frontend/backend integration.

SELECTED PROJECTS

OpenRole Observatory — Live demo | Data engineering

Python, FastAPI, PostgreSQL, SQLAlchemy, Next.js, TypeScript, Cloudflare R2

- Built an idempotent job-data pipeline with raw-source evidence, immutable listing history and change tracking; ingested 1,281 listings from 25 Greenhouse boards.
- Delivered public job search and an internal operations dashboard; deployed with Neon, Render and Vercel.

SecondTrip — Live private beta | Solo build

Next.js, TypeScript, FastAPI, Python, PostgreSQL, SQLAlchemy, Cloudflare R2

- Built multi-tenant callback and rework analytics with validated CSV imports, explainable deterministic scoring and a manager review queue with append-only decision history.
- Implemented PostgreSQL row-level security, a durable job queue, secure cookie sessions and private file storage.

EDUCATION

Bachelor of Science in Computer Science — 2021 - 2025

Central Philippine University | Iloilo City, Philippines

Vocational Degree in Computer Technology — 2019 - 2021

Professional Electronics Institute Inc. | Iloilo City, Philippines

Language: English - B2 (CEFR)
