

Jaylord Vhan Fabor

Software Engineering | Backend Development | AI Developer

Iloilo City, PH · +63-919-848-4665 · faborjaylordvhan@gmail.com · github.com/jjayfabor

PROFESSIONAL EXPERIENCE

Junior Software Developer

Callbox Inc — Iloilo City, PH

October 2025 – Present

- Designed and developed AI Voice Agents using Vapi, fine-tuning responses for consistency and human-like conversational quality.
- Leveraged AI coding tools, particularly Claude and Claude Code, to accelerate development workflows and improve code quality.
- Utilized OpenClaw's multi-agent framework to build applications faster, creating custom skills to maximize token efficiency and reduce repetitive prompting overhead.
- Applied AI-assisted development practices within Callbox projects, resulting in faster feature delivery and reduced development overhead.

Software Development Intern

Callbox Inc — Iloilo City, PH

February 2025 – May 2025

- Assisted in the development and implementation of Laravel-based applications.
- Helped optimize application performance across multiple modules.
- Collaborated with the development team to integrate frontend and backend components.
- Gained hands-on experience with Laravel, MySQL, and best practices in web development.

Software Developer

Freelance — Iloilo City, PH

- Improved overall UI/UX design of the application to enhance user engagement and accessibility.
- Integrated Stripe Wallet for secure and seamless payment processing.
- Developed and implemented a custom API utilized by the ElevenLabs AI Voice Agent as a webhook for handling user authentication and data exchange.
- Implemented ElevenLabs AI Voice Agent with Twilio integration to handle OTP verification and voice interactions.
- Explored and integrated OpenClaw for multi-agent orchestration, creating custom skills and agents to streamline development productivity.
