Software Engineering | Backend Development | Web Development

Software engineer with experience in Laravel and Python backends, CRM customization, and AI/automation integration (voice agents, LLMs, n8n). Focused on shipping practical tools that cut manual work for business teams.

- Systems Development
- Software Implementation
- Computer Engineering
- User Experience
- Agile Development
- Code Maintenance
- Technical Troubleshooting
- Debugging & Research

PROFESSIONAL EXPERIENCE

Junior Software Developer | Callbox Inc, Iloilo City, PH

10/2025 – 07/2026

- Developed and customized HubSpot CRM solutions for sales and marketing teams — automated workflows, custom-coded actions (JavaScript/Python), and API integrations connecting HubSpot to the company pipeline database.
- Built and deployed an AI-powered Google Chat bot on Google Cloud Run, integrating Vertex AI and a RAG pipeline that uses historical Google Chat Space conversations as a knowledge base to provide context-aware, grounded responses.
- Built n8n workflows automating role-based document provisioning across the employee lifecycle — granting, revoking, and reassigning access to role-specific documents on hire, promotion, and demotion, with automated delivery via Google Drive, SFTP, and email.
- Implemented VAPI AI voice agents for automated webinar invitations and event reminders, handling 300+ outbound calls per campaign and increasing attendance.
- Coordinated between development and operations teams to ensure controlled, low-risk feature rollouts and deployments.
- Performed proactive debugging and issue resolution to reduce downtime and improve overall platform reliability.

Software Developer | Freelance, Iloilo City, PH

- Developing a custom REST API consumed as a webhook by an ElevenLabs AI voice agent via Twilio — handling user authentication, OTP verification, and appointment booking over live phone calls.
- Building a cross-platform Flutter mobile app for iOS and Android, extending the platform's core booking features and AI-powered scheduling to mobile users.
- Integrated Stripe for in-app payments and wallet functionality.
- Designed the data model and API architecture supporting users, providers, availability, bookings.
- Improved frontend UI/UX and optimized backend query performance ahead of launch.

Software Development Intern | Callbox Inc, Iloilo City, PH

02/2025 – 05/2025

- Assisted in the development and implementation of Laravel-based applications.
- Helped optimize application performance.
- Collaborated with the development team to integrate frontend and backend components.
- Gained hands-on experience with Laravel, MySQL, and best practices in web development.

EDUCATION

Bachelor of Science in Computer Science (2021 - 2025)

Central Philippine University – Iloilo City, Philippines

Vocational Degree in Computer Technology (2019 - 2021)

Professional Electronics Institute Inc. – Iloilo City, Philippines
